EDUCATION

JB Knowledge Park (MDU)

Aug 2022 – May 2025

Bachelor of Computer Applications (BCA)

Faridabad, India

TECHNICAL SKILLS

Languages: JavaScript, C++, SQL, NoSQL (MongoDB)

Frameworks: React.js, React-Native, Next.js, Node.js, Express.js, Tailwind CSS

Tools: Git, GitHub, Postman, VS Code, Sublime Text

Databases/APIs: Supabase, MongoDB, REST APIs, Mongoose

EXPERIENCE

Drema AI

August 2025 – Present

Full Stack Developer (Intern)

Remote / Noida, India

Edunique ↗

- Working on **EdUnique**, a skill-based education platform designed to help students and professionals enhance their learning experience.
- Developed core features like secure authentication, dynamic dashboards, real-time content updates.
- Implemented scalable backend APIs and UI using **NextJs** and **Supabase**, ensuring optimized performance.
- Collaborated with a cross-functional team of 6 developers and integrated sserver-side rendering for a smooth user experience.
- Worked on analytics dashboards tracking user activity and engagement, boosting course completion rates by 25%.

Simplifying Skills ↗

- Worked on SimplifyingSkills, an EdTech platform centered around their flagship assessment product ****SkillSphere****, which evaluates psychometrics (OCEAN), socio-emotional intelligence, interests (Holland), adversity quotient, and aptitude (DAT).
- Developed user-facing dashboards for students to view their detailed report, strengths growth areas, and recommended career pathways.
- Integrated authentication, role-based access, and subscription gating so premium users can unlock deeper insights and fellowship or global exposure opportunities.
- Collaborated on features for “Skill Development Clubs” where students join domain-specific communities (e.g. Business, Arts, Tech) to receive curated learning paths.

PROJECTS

MemeHustle ↗

- Built an AI-powered meme marketplace where users can upload, explore, and bid on trending memes; tested with 50+ sample users.
- Integrated Google Gemini API to auto-generate captions and vibe descriptions for memes using 3–5 user-defined tags, improving engagement quality by 40%.
- Designed and deployed a full-stack architecture using React, Node.js, Express.js, and MongoDB; handled over 50 meme uploads during testing.
- Created a dynamic leaderboard system to rank top 10 meme creators based on upvotes and bids, boosting community interaction by 60%.

HACKATHONS AND LEADERSHIP

Deepfake Detection Platform (Aravalli College, Faridabad): Designed the UI for a tool aimed at identifying deepfake media, ensuring responsive design.

AI-Based News Checker (SGU College, Ghaziabad): Built the UI for a 24-hour hackathon project focused on detecting misinformation using NLP.

Ideathon Organizer (JB Knowledge Park, MDU): Organized and managed a university-wide ideathon, encouraging 50+ students and 20+ teams to pitch innovative tech solutions.
