EDUCATION

JB Knowledge Park (MDU)

Bachelor of Computer Applications (BCA)

Aug 2022 – May 2025

Faridabad, India

TECHNICAL SKILLS

Languages: JavaScript, C++, SQL, NoSQL (MongoDB)

Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS

Tools: Git, GitHub, Postman, VS Code, Sublime Text

Databases/APIs: MongoDB, REST APIs, Mongoose

PROJECTS

IRCTC Clone

- Built a train reservation system with JWT-based role segregation; supported 100+ user simulations including admin and passenger roles.
- Engineered train search API leveraging trie data structure and optimized indexing, decreasing average query response time to 90ms and improving user satisfaction scores by 15%.
- Created secure user authentication with bcrypt-encrypted credentials and middleware to safeguard 10+ protected routes.
- Designed a mobile-first UI using React.js and Tailwind CSS; tested on 5+ device widths to ensure responsive UX.
- Backend Repository

Music Course Hub

- Developed a music course platform used by over 30 trial users to browse, purchase, and inquire about 20+ instrument-based courses.
- Developed an admin dashboard to manage course listings and categories with real-time update features, cutting manual edits by 70%.
- Integrated automated email notifications using Nodemailer; tested with 25+ inquiries ensuring instant delivery under 3 seconds.
- Structured 15+ backend endpoints using Express.js for handling courses, user auth, and email messages, stored in MongoDB.
- Backend Repository

INTERNSHIP

CodSoft

Jan 2025 – Feb 2025

Software Developer

- Delivered a cross-platform frontend designed with React.js and Tailwind CSS; achieved 98% score on mobile usability audit.
- Engineered 12+ backend endpoints covering CRUD, auth, and admin logic; ensured 100% functionality during integration tests.
- Enhanced backend reliability by 60% through input validation and exception handling using express-validator and logging utilities.
- Instituted a Git branching strategy that minimized code conflicts, resulting in a 15% reduction in integration errors and improved the stability of software deployment cycles for ten distinct backend routes.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs, Git, Postman
